

# Homework/Extension

## Step 10: Two-Step Problems

### National Curriculum Objectives:

Mathematics Year 2: (2M9) [Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change](#)

### Differentiation:

Questions 1, 4 and 7 (Varied Fluency)

**Developing** Calculate the cost of one item to work out how many can be bought with another given value. Whole pounds, or pence up to £1. Multiples of 5 only and bar model included for scaffolding.

**Expected** Calculate the cost of one item to work out how many can be bought with another given value. Whole pounds, or pence up to £1. Bar model included for scaffolding.

**Greater Depth** Calculate the cost of one item to work out how many can be bought with another given value. Whole pounds, or pence up to £1.

Questions 2, 5 and 8 (Varied Fluency)

**Developing** Calculate which two items create the change from a given value. Whole pounds, or pence up to £1. Multiples of 5 only and pictorial representation of the cost of each item given.

**Expected** Calculate which two items create the change from a given value. Whole pounds, or pence up to £1.

**Greater Depth** Calculate which two items create the change from a given value. Whole pounds, or pence up to £1. Written amounts of multiple values are given.

Questions 3, 6 and 9 (Reasoning and Problem Solving)

**Developing** Explain whether or not two items from a selection will provide the correct change from a given amount. Whole pounds, or pence up to £1. Multiples of 5 only. Pictorial representation of the cost of each item included for scaffolding.

**Expected** Explain whether or not two items from a given selection will provide the correct change from a given amount. Whole pounds, or pence up to £1.

**Greater Depth** Explain whether or not two items from a given selection will provide the correct change from a given amount. Whole pounds, or pence up to £1. Written amounts of multiple values given and more than one possibility is provided.

## Two-Step Problems

1. Liam has 80p. He buys a lolly from the sweet shop and gets 60p change. How much does a lolly cost?

How many lollies can Liam buy with 40p?

VF  
HW/Ext

2. Olivia has a £5 note to spend in the pet shop.

She buys two pets and gets £1 change. Which two pets does she buy?

How much more money does she need to buy the spider?

VF  
HW/Ext

3. Sophie has a £1 coin to spend at the shop.

She says,

If I buy two different cakes from the shop with my £1 coin, the shopkeeper will give me 20p change.

Is she correct? Explain your answer.

RPS  
HW/Ext

## Two-Step Problems

4. Asif has £20. He buys two tennis balls from the sports shop and gets £16 change. How much does each ball cost?

<b>£20</b>		
 <div style="border: 1px solid black; padding: 2px; display: inline-block;">?</div>	 <div style="border: 1px solid black; padding: 2px; display: inline-block;">?</div>	<b>£16</b>

How many balls can Asif buy with £10?

VF  
HW/Ext

5. Millie has £25 to spend in the toy shop.

She buys two toys and gets £3 change. Which two toys does she buy?

How much more money does she need to buy the car?

VF  
HW/Ext

6. Jack has a £1 coin to spend at the shop.

He says,

If I buy two pieces of fruit from the shop with my £1 coin, the shopkeeper will give me 6p change.

Is he correct? Explain your answer.

RPS  
HW/Ext

## Two-Step Problems

7. Roman has £30. He buys two T-shirts from the clothes shop and gets £8 change. How much does each T-shirt cost?

How many T-shirts can Roman buy with £50? How much change will he get?

VF  
HW/Ext

8. Alana has one £10 note, one £5 note, two £1 coins and two 50p coins to spend in the jewellery shop.

She buys two items of jewellery and gets £1 change. Which two items does she buy?

How much more money does she need to buy the earrings?

VF  
HW/Ext

9. Caleb has a £1 coin to spend at the pet shop.

He says,

If I buy two different aquarium fish from the pet shop with my £1 coin, the shopkeeper will give me 2p change.

Is he correct? Explain your answer.

RPS  
HW/Ext

## Homework/Extension

### Two-Step Problems

#### Developing

1. One lolly is 20p. Liam can buy 2 lollies with 40p.
2. Olivia buys the snail and the fish. She needs £1 more to buy the spider.
3. Sophie is correct because  $50\text{p} + 30\text{p} = 80\text{p}$  and  $£1 - 80\text{p} = 20\text{p}$ .

#### Expected

4. One tennis ball is £2. Asif can buy 5 tennis balls with £10.
5. Millie buys the robot and the train. She needs £8 more to buy the car.
6. Jack is correct because  $70\text{p} + 24\text{p} = 94\text{p}$  and  $£1 - 94\text{p} = 6\text{p}$ .

#### Greater Depth

7. One T-shirt costs £11. Roman can buy 4 T-shirts with £50 and will get £6 change.
8. Alana buys the watch and the necklace. She needs £5 more to buy the earrings.
9. Various answers, for example: Caleb is correct because sixty-two pence + thirty-six pence = 98p and  $£1 - 98\text{p} = 2\text{p}$ .
