

Many people like to eat tomato sauce.

You can buy it at the supermarket, but...

?
...how is tomato sauce made?

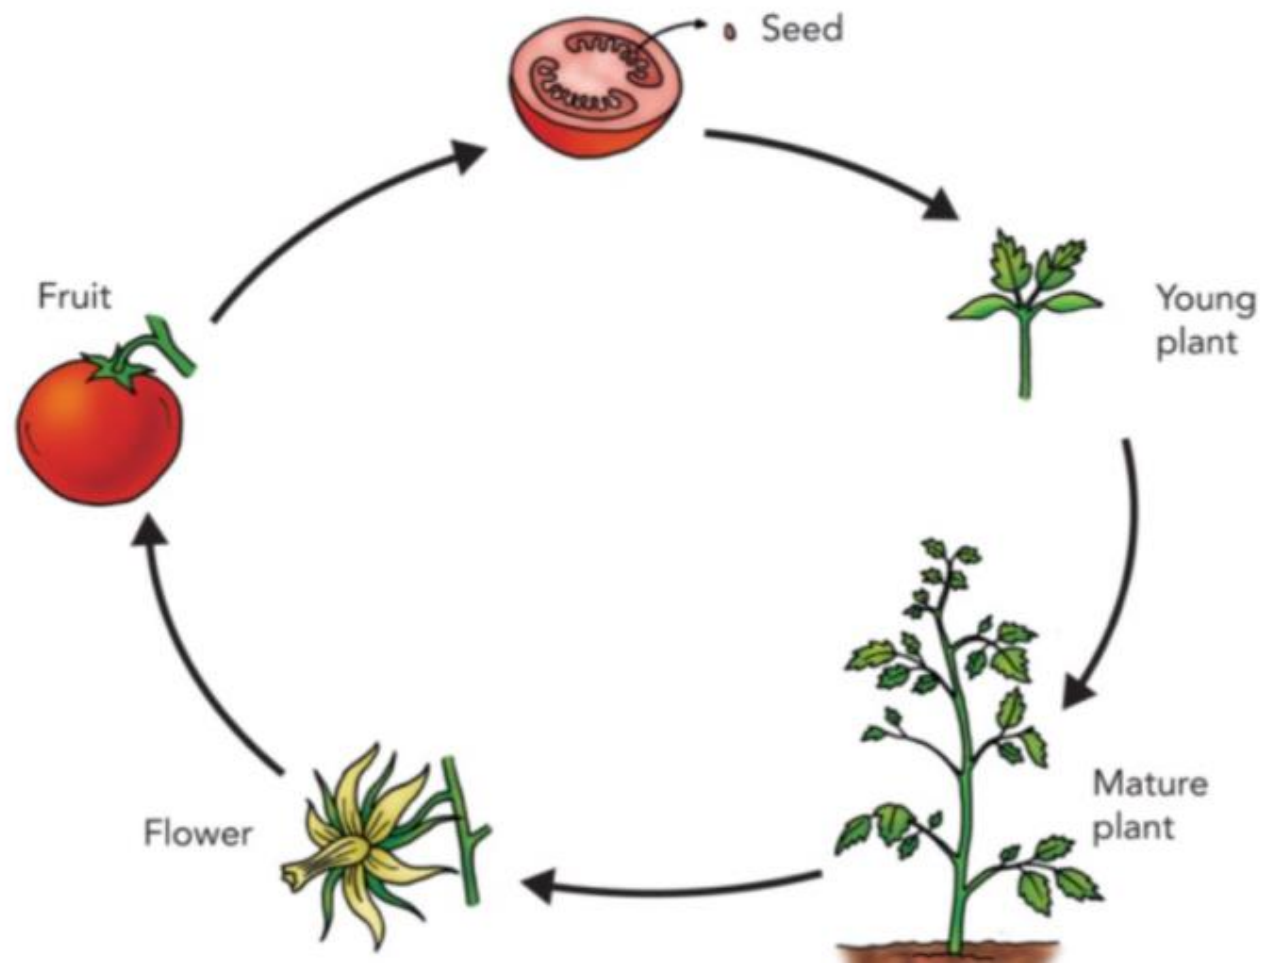

First people need to grow lots of tomatoes

on a farm or in a green house.

Tomato seeds grow into plants, the plants flower, then grow tomatoes.

The tomatoes are picked and taken to the factory.

The factory uses machines and people to wash, cook and chop the

tomatoes into paste.

Salt, oil and spices are added and the sauce is mixed.

The tomato sauce is put into containers

and sold in shops and supermarkets.

Lets remember the process of making tomato sauce.
