2001

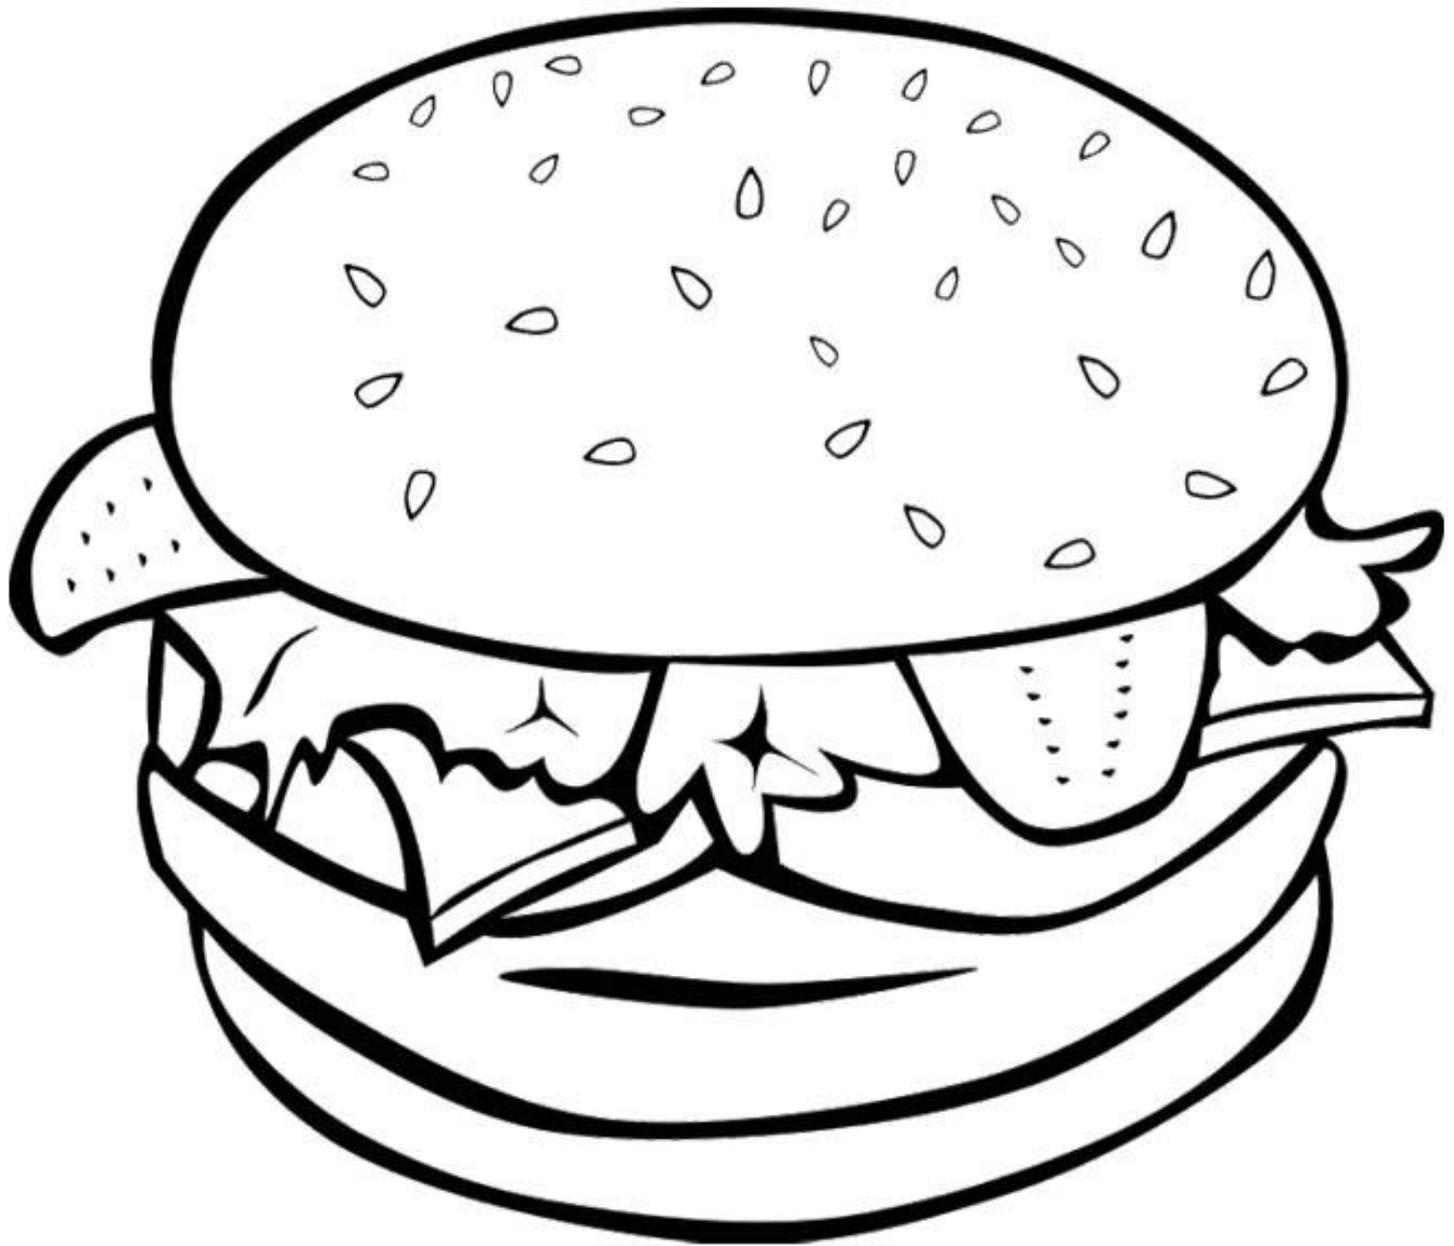

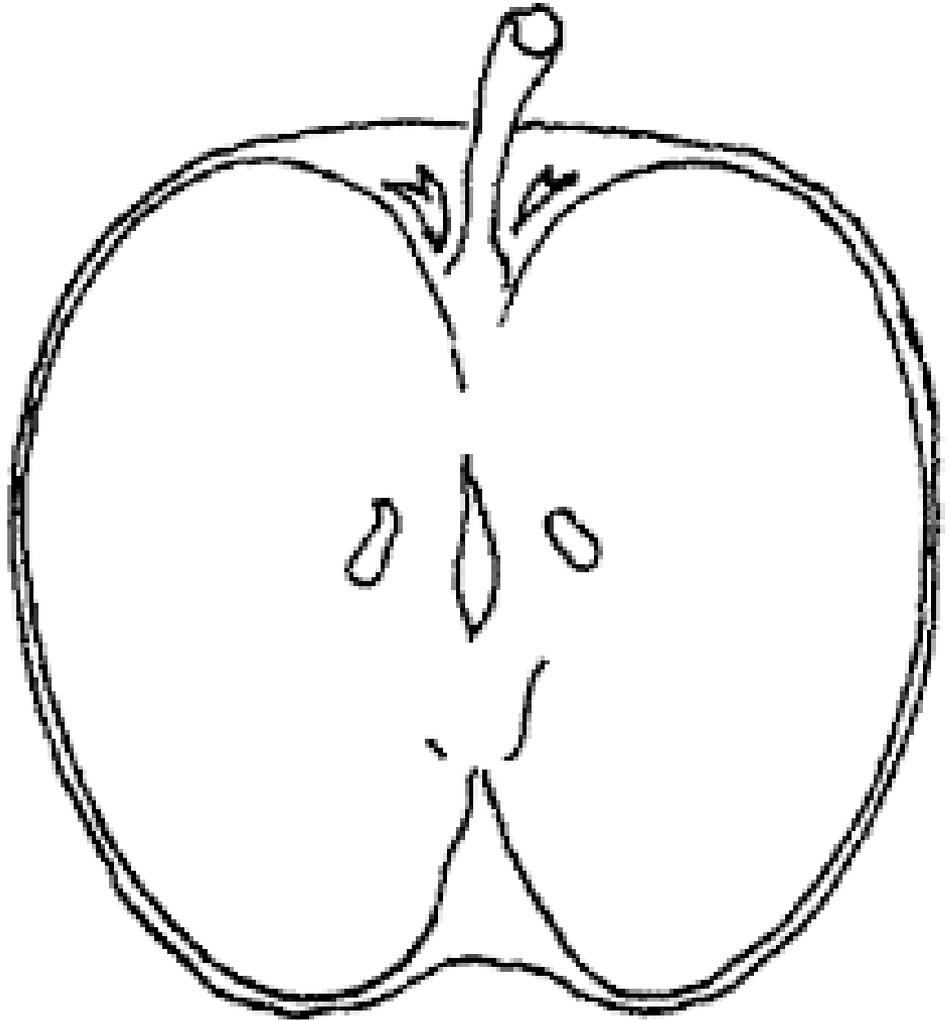

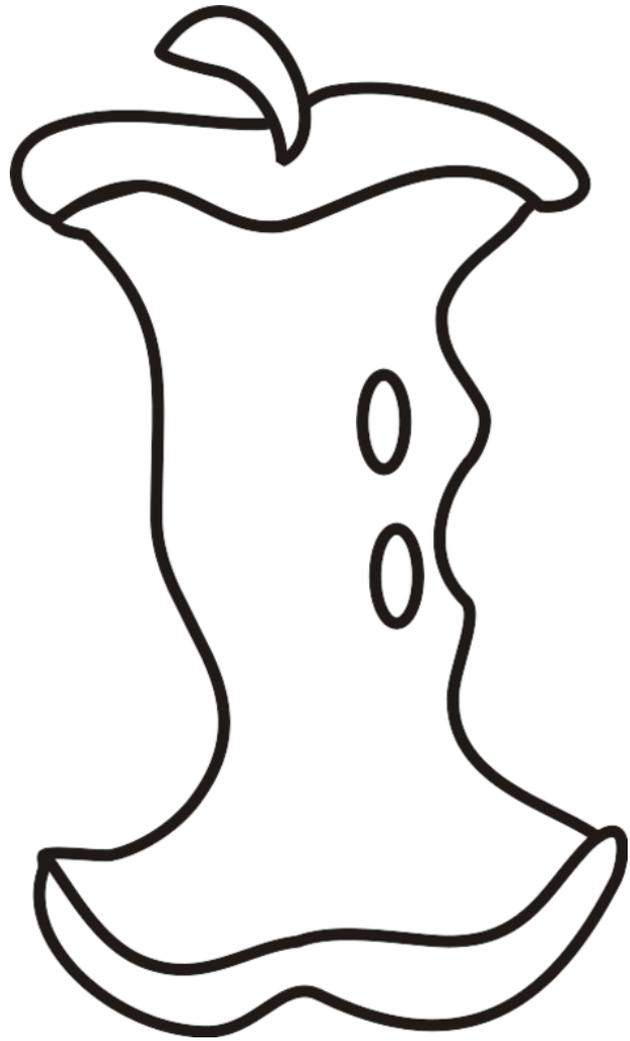

'Floor Cake' Claes Oldenburg, 1962, latex, canvas and foam rubber

'Apple Core' Claes Oldenburg, 1992, stainless steel, urethane foam, urethane hardcoat

Term 6 Task 6

Claes Oldenburg created many sculptures using the theme of food. He made these items really big so it was a different way of seeing them.

What's your favourite food? Have a go at drawing it.

If you have any playdoh or clay you could try and make a 3D model of an item of food.

You could use Lego or any building equipment. If you have pva glue you could mix it with a little water and stick newspaper over crunched up pieces of paper to make some paper-mache models of food. Here are some examples:

How to make ice-cream cones.

You will need:

Flower pot

Newspaper/paper

Pva glue mixed with a little water.

Paint

1. Scrunch up some newspaper into balls to make the icecream.
2. Cover with small pieces of paper and pva glue.
3. Wait to dry
4. Paint using ice cream colours.
5. Decorate with dripping paint or glitter.
