

DT

Two weeks project: making a model of a dream playground.

Look at the pictures of playground models made by other children ([see the worksheet Playground ideas](#)). Encourage your child to identify some of the materials used for making different swings, slides, etc.

Use some recycled cards, paper, small boxes, straws, lolly sticks, cardboard, pipe cleaners etc, iPads to make different equipment. Discuss the use of stretchy, soft, hard and different textured materials for different parts of the equipment.

Take pictures if possible.
