

Science

Uses of Everyday Materials

Identifying Uses

Aim

- I can identify uses of different everyday materials.

Success Criteria

- I can identify different everyday materials.
- I can suggest materials that familiar objects are made from.
- I can explain what 3 different materials can be used for.

What Do We Already Know?

Think back to your Science learning in Year 1. See if you can answer some of these questions with a partner:

How many everyday materials can you name and what were the materials used for?

Can you remember anything about them?

- What did they look like?
- What did they feel like?
- How did they behave?

Can you remember doing any investigations?

What did you find out and what did you learn?

Think Again...

Look at the materials in these photos. What might they be used for?

Have a look around the classroom. Can you see any familiar objects which are made from these materials?
