## **Safety at home**

### **Hazardous substances**

[Things that might be dangerous - BBC Bitesize](#)

Watch the video and discuss what common household substances may be harmful.

Share the PowerPoint *Medicine and harmful substances*.

Look at household substance bottles and see which are safe and unsafe to touch. What do they contain? Look at the symbols.

Look through the warning symbol card worksheet. Cut and mix up the cards, then work together to match them up.

Complete the *Safe or Unsafe sorting* worksheet. Discuss which would be the safest option and why (give a choice of 2 to make this easier)
